

## **Suggested Sources for Mechanical Door Locks**

There are many styles and sources available so be sure to check for local suppliers; look in the telephone directory under “Locks” or “Locksmiths.”

This style is one that I’ve seen used in many veterinary practices with great success because it is very sturdy and durable. The mechanical style is usually better for most practices than the electronic style because they require no electricity or batteries. This same style lock is available with handles instead of knobs if desired.

There are also styles available for commercial glass doors (called narrow stile doors).

Here are some suggested sources and prices (as of 2/5/03):

**Kaba Ilco**, ([http://www.kaba-ilco.com/products/access\\_controls/index.asp](http://www.kaba-ilco.com/products/access_controls/index.asp)), (800) 849-8324

- 1000 Series Locks Price Approximately \$300

**The Keyless Lock Store** (<http://www.nokey.com/>), 516 625-3184

- Item Number 1145, Approx \$310

**MrLock** (<http://www.mrlock.com/simplex/Default.asp>), 817-571-1324

- Model Number 1011-26D-41, Price not listed but approximately \$300.
